

UofL Physicians

Who We Are

The University of Louisville Physicians is a collaborative group of 600 dedicated, caring physicians who work together to care for patients from their prenatal days to their senior years. They are professors, teaching tomorrow's doctors. And they are researchers, bringing ground-breaking innovations to their patients, the community and the practice of medicine.

Our History and Vision

The clinical practices of the UofL School of Medicine have joined together to form the largest physician practice group in the Louisville region. UofL Physicians is a private, non-profit, 501(c) (3) corporation that was formally incorporated on March 17, 2010, and integrated during calendar year 2012.

As an integrated clinical practice, the increased size and streamlined structure of UofL Physicians allows its providers to deliver the highest level of patient care through collaboration, continuity of care, shared electronic medical records, single registration, improved patient-to-physician communication and organizational quality and customer service standards.

QUICK FACTS:

- 600 physicians and 78 specialties
- 1,400 employees, making it one of the top 20 largest employers in Louisville
- 224,000 patients seen annually
- 110 locations across the region
- 49 of our doctors were recognized as 2013 Top Docs
- More than 95% of Kosair doctors are UofL Physicians

UofL PHYSICIANS HIGHLIGHTS:

- First heart transplant in Kentucky
- First liver transplant in Kentucky
- First retinal transplant in the United States
- First official burn unit in Kentucky
- First hand transplant in the United States
